# Textbusters: Detecting LLM-Generated Text

Yasmin Zakaim & Elia Yakin

#### **Team Introduction**

Elia Yakin

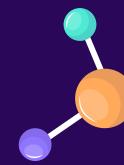

Yasmin Zakaim yasminz.com

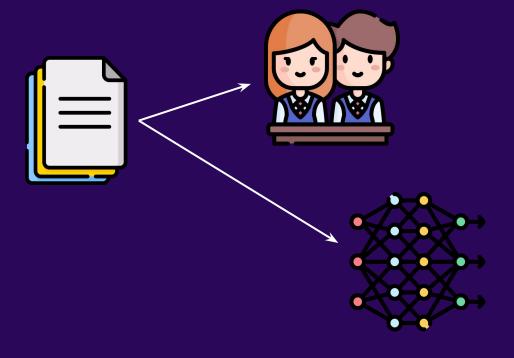

#### Overview

- 1. The Challenge
- 2. Provided Data
- 3. Competition Constraints
- 4. Our Strategy
- 5. Architecture
- 6. Results
- 7. Conclusions

### The Challenge

#### **Provided Data**

- Train set of:
  - o 1,375 essays written by students
  - o **3** essays written by LLMs
- Test set of about 8,600 instances

#### **Competition Constraints**

- Submission run-time <= 9 hours</li>
- Submission independent of internet access

#### Our Strategy

- Using multiple methods to enhance our learning
- Lean pipeline
- Starting with public data
- Prioritizing syntax over semantics
- Misspelled words as a main model feature

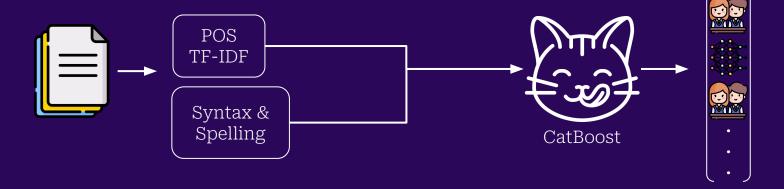

#### **Initial Architecture**

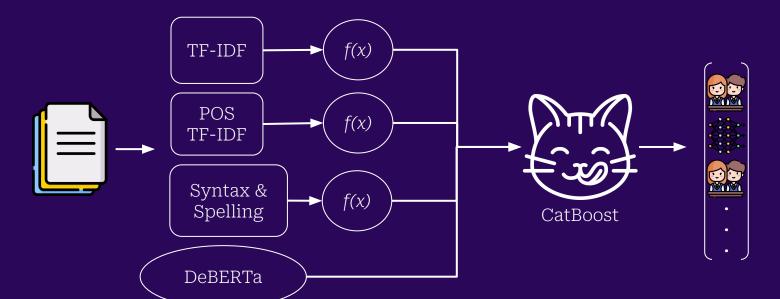

#### **Final Architecture**

#### Results

**0.83**Public Score

**0.74** Private Score

**67**% Rank Percentile

#	Team	Members	Score	Entries
1	<b>♥ ■ ★ ♡</b>		0.987	331
2	Guanshuo Xu	<b>(5)</b>	0.983	74
3	nlp team	(1) (1)	0.974	280
4	Ertugrul & Chase	<b>(1)</b>	0.973	399
5	Linguistic Ninjas	€ 📦 +3	0.972	289
6	Davide Cozzolino	<b>(a)</b>	<b>0</b> .969	33
7	Hao Mei	<b>(†)</b>	0.965	78
			e oragam	

#### Conclusions

- Teams it's complicated
- Submission, submission, submission!
- Discussion, discussion, discussion!

## Thank you:)
